PROFESSIONAL SUMMARY

- Software Engineer with 3+ years of experience building enterprise healthcare applications using Python, FastAPI, .NET, React, SQL, and modern software engineering practices. Experienced in backend microservices, REST API development, AI-powered applications, and LLM integrations using OpenAI, Azure OpenAI, and Gemini. Strong foundation in Big Data Analytics and Artificial Intelligence with expertise in healthcare technology and AI-assisted engineering workflows.

WORK EXPERIENCE

Kanini Software Solutions

Full Stack Software Developer

Bangalore, India

Oct 2023 – Present

- Develop enterprise healthcare applications using Python, FastAPI, .NET, React, SQL, and cloud-enabled software engineering practices.
- Design and maintain Python-based backend services and microservices supporting healthcare workflows and business-critical functionality.
- Build RESTful APIs using FastAPI and implement backend integrations across healthcare platforms and internal services.
- Integrate OpenAI, Azure OpenAI, and Google Gemini services to enable AI-powered healthcare workflows, automation, and intelligent user experiences.
- Participate in prompt engineering, LLM experimentation, AI feature development, and evaluation initiatives within healthcare technology solutions.
- Work extensively with SQL databases, backend data models, and service integrations supporting Electronic Health Record (EHR) platforms.
- Collaborate with product owners, architects, QA teams, and stakeholders to deliver scalable software solutions in SAFe Agile environments.
- Utilize ChatGPT, Claude, GitHub Copilot, and Cursor to accelerate development, debugging, documentation, and technical research activities.

Kanini Software Solutions

Project Trainee

Bangalore, India

Feb 2023 – Oct 2023

- Achieved 4th rank among approximately 100 trainees in a competitive software engineering training program.
- Developed full-stack applications using .NET, JavaScript, SQL, HTML, and CSS while applying software engineering best practices.
- Built healthcare-focused EHR modules simulating real-world clinical and operational workflows.
- Developed functionality for travel booking and assessment management applications, strengthening full-stack engineering capabilities.
- Collaborated in Agile teams to deliver end-to-end application functionality and project milestones.

Tequed Labs

IoT Intern

Bangalore, India

2022

- Assisted in the development and testing of IoT solutions involving hardware-software integration.
- Conducted research on emerging IoT technologies and participated in prototype validation and debugging activities.

SELECTED AI & PYTHON PROJECTS

- **Healthcare AI Assistant:** Developed an AI-powered healthcare assistant using Python, FastAPI, PostgreSQL, Redis, Docker, and OpenAI APIs. Implemented Retrieval-Augmented Generation (RAG), vector search, embeddings, and backend APIs supporting healthcare knowledge retrieval workflows.
- **Resume Intelligence Platform:** Built an AI-powered resume analysis platform using Python, FastAPI, React, PostgreSQL, and OpenAI APIs. Implemented ATS scoring, skill-gap analysis, recommendation generation, and LLM-powered feedback workflows.
- **Personal Knowledge Assistant:** Developed a conversational RAG platform using Python, FastAPI, LangChain, ChromaDB, and React. Implemented document ingestion, embeddings generation, semantic search, and contextual knowledge retrieval pipelines.

- **Production-Ready SaaS Platform:** Built a SaaS application using Python, FastAPI, PostgreSQL, Docker, and GitHub Actions. Implemented authentication, authorization, REST APIs, CI/CD automation, and scalable backend architecture patterns.

ADDITIONAL PROJECTS

- **Electronic Health Record (EHR) Platform:** Contributed to the development and enhancement of enterprise healthcare software supporting provider workflows, operational processes, and user-facing functionality using React, .NET, and SQL technologies.
- **Job Seeker Assessment Portal:** Developed a web-based assessment platform supporting candidate evaluation, administrative workflows, and result management using ASP.NET, SQL Server, and JavaScript.
- **Make My Trip Clone:** Built a travel booking application supporting reservation and trip management workflows using ASP.NET, SQL Server, JavaScript, HTML, and CSS.
- **Image, Audio and Video Steganography:** Developed a multimedia security solution for secure information embedding and extraction using Java and information security concepts.

EDUCATION

Master of Technology (M.Tech)	India
<i>Big Data Analytics & Artificial Intelligence</i>	<i>2024 – 2026</i>
○ Relevant Areas: Machine Learning, Deep Learning, Natural Language Processing, Statistics, Big Data Frameworks, Data Analytics	
Bachelor of Engineering (B.E.)	India
<i>Computer Science & Engineering</i>	<i>2019 – 2023</i>
○ Relevant Areas: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering	

LEADERSHIP & COMMUNITY IMPACT

- **Volunteer Mentor & Educator – U&I NGO:** Mentored and guided young students through structured educational programs focused on academic growth, confidence building, communication skills, and long-term learning habits. Simplified complex concepts into engaging lessons and provided continuous guidance to help students achieve their educational goals.
- **Volunteer Educator – Ramakrishna Mission:** Conducted educational outreach sessions introducing students to computer science, technology careers, and lifelong learning while promoting curiosity, critical thinking, and personal development.

SKILLS

Primary Languages: Python, C#, JavaScript, SQL
Additional Languages: Java, TypeScript, C++, HTML, CSS
Backend Engineering: FastAPI, Python Microservices, REST APIs, SQLAlchemy, ASP.NET Core, .NET Core, JWT Authentication, API Design, Service Integration
AI & LLM Engineering: OpenAI, Azure OpenAI, Gemini, LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering, Embeddings, Vector Search, LLM Applications
Databases: PostgreSQL, MySQL, Redis, Snowflake, ChromaDB, PGVector
Cloud & DevOps: Docker, Git, GitHub Actions, Google Cloud Platform (GCP), CI/CD Fundamentals
Methodologies: SAFe Agile, Agile Development, Scrum, Object-Oriented Design, Design Patterns, SDLC
